

GenAI Statement

In this assessment, I have used ChatGPT to help me understand how best to include film music relating to the cross-curricular priorities of Aboriginal and Torres Strait Islander Histories and Cultures, as well as Asia and Australia's Engagement with Asia and it suggested music I could use.

I also used it to help with my assessment of **learning** paragraphs in the unit of study guide. I was struggling to tie this effectively to the unit as a whole and I felt it provide an excellent summary.

I also used it to generate example answers for my listening grid and to streamline the column titles. ChatGPT suggested *Jaws* as an example.

Finally, I sanity-checked my week-by-week activities in my unit of study using AI feedback. While it generated some alternative suggestions, they were mostly arbitrary and did not flag any structural issues with my unit of study.
