How to 'read' the Quality Teaching model

- The Three Dimensions are 'critical'
- Intellectual Quality = *students being challenged to learn something*
- Quality Learning Environment = *students being socially and pedagogically supported*
- Significance = *students being engaged*
- Each 'element' is really an 'indicator' of the presence of its dimension, or a 'pathway' to achieving the dimension.

4

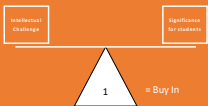

Quality Teaching

- Intellectual Quality
- Significance
- Quality Learning Environment
