

Final Year Internship: Teaching Performance Assessment (TPA)

CONTEXTUAL ANALYSIS

San Clemente High School is a multicultural and co-educational secondary school that caters for Years 7-10. This Catholic high school is located in Mayfield, a suburb within the Maitland-Newcastle Diocese. Originally established in 1916, the School is a member of the Dominican Tradition, and have since also adopted the philosophies of Positive Education. San Clemente caters to a wide cohort of students and families from a diversity of socioeconomic, cultural and linguistic backgrounds, and as of January 2022, there were 745 students enrolled at the school from a total of 28 linguistic backgrounds. Of this student population, 22% identify as possessing a language background other than English, and 11% identify as Indigenous.

The focus class chosen for the TPA is one of my Year 7 History classes, 7HISE. As of Term 3 2022, this class consists of 24 students: 14 of which identify as male; and 10 identify as female with a very mixed range of literacy, numeracy and communication capabilities. In particular, this class includes three students with significant *Learner Profile and Adjustment Plans*, and there are several students that require significant differentiation for various learning difficulties such as hearing impairments, dyslexia, Level 2 Autism Spectrum Disorder, anxiety disorders, and imputed cognitive disabilities. Additionally, this class consists of two students that identify as Aboriginal and six of EALD background.

During my internship, students explored two units: *Investigating the Ancient Past* and *The Asian World: Early Imperial China*. For the first seven weeks, students completed their introductory study of *Investigating the Ancient Past*, in which they explored the nature of history and historical sources, as well as the origins of the earliest human civilisations. For the final three weeks, students conducted a condensed investigation into *The Asian World*, with a focus on the cultural practices and beliefs that defined Early Imperial China.

Due to the disruptive nature of students' schooling in recent years with remote learning and their transition to high school, both attendance and academic performance declined. Hence, staff decided to embed a literary focus into the Year 7 HSIE program, and postpone the summative assessment task for Term 3.

PLANNING FOR LEARNING (1.2.1, 2.3.1, 3.1.1, 3.2.1):

ANALYSIS OF STUDENT LEARNING NEEDS:

To effectively plan and prepare for quality teaching and learning with my focus class, I explored the Individual Learning Plans (ILPs) of my students in 7HISE (as available on the School's Compass Portal), as well as took detailed observation and reflection notes on student engagement, motivation and behaviour throughout the first weeks of my internship. In collaboration with my Supervising Teacher and relevant Learning Support Case Managers I developed

learner profiles that synthesised my own notes with formal data such as students' CogAT, NAPLAN and ACER PAT results, and used existing information such as students' individualised needs, interests and competencies (see below).

Throughout my internship, I utilised these *Annotated Student Learner Profiles* to assess students' academic performance in foundational literary areas of reading, writing and verbal reasoning, and effectively responded to the diverse learning needs of this mixed ability class by developing learning goals and success criteria that provided all students with achievable challenges within their unique Zones of Proximal Development (APST 3.1.1). In alignment with APST 1.2.1, my application of Vygotsky's theory ensured that teaching and learning was "directed at the optimum level for each child, to lead their development forward" (Duchesne & McMaugh, 2019, p. 126).

This understanding was employed throughout my development of a class routine – as outlined within the *Introduction* of my lesson plans – in which students were initially settled before the teacher provided a brief overview of the lesson activities, included an explicit articulation of the Learning Intention and Success Criteria, as well as discussion with students around the significance of this lesson in relation to prior lessons, the unit as a whole and their upcoming Assessment Task. In turn, all learning activities followed a similar pattern of explicit teacher instruction, followed by a deep level of scaffolding in which a small portion of each activity was modelled by the teacher, prior to students' independent or collaborative participation in completion of the activity. The quality nature of such explicit instruction and goal setting prior to learning is affirmed by Foreman & Arthur-Kelly (2017), who accentuate that "teaching practices that focus on making learning processes visible and explicit are consistently associated with more effective outcomes for students with learning difficulties...[as well as] provide benefits for all learners" (p. 367), as they are afforded opportunities to engage in metacognitive discussions, ask questions and cultivate accountability over their own learning.

ANNOTATED LEARNER PROFILE OF STUDENT H

Student	<i>Student H</i>	<i>Insert Photo of Student H</i>	
Grade in 2022	Year 7		
Disability	ASD (Level 2), ADHD, Anxiety		
Case Manager	<i>Insert name of Case Manager</i>		

2022 Student Goals:

FORMAL STUDENT DATA			
CogAT Data	VR – 7 QR – 4 NVR – 6 C VQN – 5	NCCD Category	Not Stated

2021 (Year 6)		2018 (Year 3)	

CURRICULUM	
General Information	Adjustments
- Working at Stage 1 for Writing and Spelling - Working at the beginning of Stage 3 in all other domains of English and Maths - Working on being able to plan/sort his ideas into logical and effective order and then write from it - Will try and get away with not doing work and pretend to not know about it - A confident speaker that will actively contribute to classroom discussions and public speaking (if prepared) - Rarely completes homework, including home research tasks – Mum doesn't pressure him to complete these - Does not enjoy PE/Sport activities - Had the same teacher for years 4-6, so may find having many teachers in high school overwhelming - Struggles with organisation and being on top of what needs to be done for school	- Set clear expectations, boundaries, and routines in the classroom - Requires significant support to commence and complete work, especially with tasks involving writing – may need to have work scribed - Consideration of location in the classroom – seat close to the teacher - Additional time to complete work - Differentiated tasks which allow him to demonstrate his knowledge and skills - Additional time for assessments - Disability provisions – extra time, reader/writer - Adjust expectations of writing to his current working level - Use of technology to complete extended writing tasks - In group tasks, establish a plan or a specific task for him to complete and write it down for him - Requires reminders to sit up whilst in a chair. If he is fidgeting, offer him a 5 minute movement break outside - Demonstrate PE activities and provide him with frequent rest breaks during PE and Sport - Assistance with organisation
Communication	Adjustments
- Will overtalk to mask his anxiety - Is honest and will own up when he does something wrong (e.g. hitting a peer who was doing something he did not like)	Visual schedule of an activity and transition between tasks (less obvious to others)
Social Skills	Adjustments
- Very sensitive about his Autism and how this impacts his ability to interact with others - Has social difficulties	- Role model appropriate social interactions - Support him in developing social connections - Boys Club is highly recommended

- Does not have a large circle of friends - Has particular 'quirks' that may make it difficult for others to get used to and accept – this may be stressful for him - Has a quirky sense of humour (sometimes dark) and loves Dad jokes – so building rapport and having a laugh with him would be beneficial	Should be introduced to students who also find social interactions difficult
---	--

Other Information:

- He has a severe fear of heights
- He has asthma
- He and his Mum were very anxious about the transition to high school, in particular, changes in routine, expectations, new teachers etc.
- Has engaged with OT, Speech Therapists and a Psychologist

Student	<i>Student J</i>	<i>Insert Photo of Student J</i>
Grade in 2022	Year 7	
Disability		
Level of Adjustment	Supplementary	
IEP (last av.)	November 2021	
Case Manager	<i>Insert name of Case Manager</i>	

2022 Student Goals:

To be comfortable with himself and who he is

FORMAL STUDENT DATA			
CogAT Data	VR – 9 QR – 6 NVR – 4 C VQN – 7	NCCD Category	Not Stated
2022 (Year 7)			
ACER PAT Data	Unavailable	NAPLAN Data	Unavailable

CURRICULUM	
General Information	Adjustments
- Works at Stage 3 level for Speaking and Listening, Number, Measurement and Problem Solving - Works at Stage 4 level for Reading, Writing and Spelling - Works best when rules and expectations are set - Thrives on routines/schedules - Does what is asked but not much more – a very capable student; does not like homework - Parents tell him “sometimes you have to be comfortable doing things that are uncomfortable” - Enjoys using technology to complete schoolwork - Struggles with group work – likes to have control and will talk a lot - Hates PE/Sport and will use avoidance techniques – does not have strong motor skills - Describes himself as a “God among other writers” – enjoys English and writing stories - Feels he learns best by using a computer to do the majority of the work, sitting near the teacher, and having a low stress environment - Has a high level of factual knowledge, especially in areas he’s interested in, especially HSIE – teachers can extend him in these areas - Likes to write ‘alternate histories’ or create own cultures, languages, geography - Enjoys role playing battles, and reads/consumes history and geography content in spare time	- Visual schedules between set activities using number labels (e.g. 1, 2, 3, 4 etc.) – that are not very obvious to other students - Remove ‘core’ and ‘extension’ wording and include in (above) visual schedule will help him go above and beyond - Utilise Learning Intention and Success Criteria in the classroom - Try to involve him in PE without a lot of pressure or negative self-talk will emerge – involve him by refereeing, clean up etc. - Does not understand team structures so when doing group work, assign group roles to his group - Encourage attendance at Homework Hub and Maths & Milo - Encourage him to work past his comfort zone

Communication	Adjustments
• Presents social communication challenges • Finds it hard to express how he is feeling at times, leading to a build-up of emotion with big reactions • Reluctant to verbally communicate when trying to self-regulate his emotions • Expresses his feelings best through writing • Very black and white in his thinking • Has a great memory	• Allow him to articulate his feelings through writing (e.g. email) • Allow him to self-regulate before talking through feelings and responses
Behaviour / Safety	Adjustments
• Signs he may be entering a meltdown – fists clenched, tenses up, head down, thumping the table, inaudibly muttering to himself, shutting down and withdrawing • Prefers his own desk/workspace – if others enter his space, he will get upset • When he feels there are no other options, he may abscond (within the school) • Has a number of sensory sensitivities including food, dirt, dust • Will often play with blue tac to self-soothe • Uses his drink bottle for anxiety and self-regulation	• Help him identify signs of meltdown behaviour and encourage him to use his FLC/reset pass to calm down to self-regulate • Self-regulates best by himself by drawing and reading books • Provide additional 'resets' and breaks within the classroom if required (be careful it does not turn into work avoidance) • Encourage him to access the FLC/Case Manager if he requires assistance or reset time
Social Skills	Adjustments
• Becomes very anxious in new and unknown environments • Has difficulty reflecting on how his words and actions make others feel • Has difficulties making and maintaining peer friendships • Can become very disruptive when he is excited • May cry when he feels overwhelmed • Can be very stubborn • Can struggle with noise • Finds lunchtime difficult – will often wander alone and talk to himself	• Inclusion in Boys Group (and where possible coding, computer opportunities) • Reminders about social protocols (e.g. raising hand before speaking) • Use of social stories to outline benefits and increase participation in activities (e.g. physical activity is positive) • Statements such as "we love your enthusiasm but lower your voice please" or "you have one minute to talk about this" provides him with feedback about his interactions • He can become quite excited about topics and reminders about self-awareness and requires reminders about social etiquette

Other Information:

- Sees a number of external specialists, including Speech Pathologist, Dietician, Psychologist, OT
- **Apprehensive about being judged for receiving support** – does not like his ASD to be labelled
- Can struggle with bell ringing and being held back. It can really confuse him as this signals he can leave – very black and white. This can become overwhelming and really disrupt his day. He does not like being 'late'. Please don't focus on him if he is late or difficult to settle. When anxious, he drinks a lot of water and needs to use the bathroom a lot.

As exemplified throughout the annotation of my attached lesson plans, the learning sequences and lessons that I developed and implemented with 7HISE were profoundly informed by available curriculum, assessment and reporting knowledge, as well as guided by the intended program plan created by the HSIE faculty (APST 2.3.1). Although I was initially presented with a detailed scope and sequence at the commencement of my internship, once I had an opportunity to engage with student data and individualised adjustment plans for this class, I manipulated the lesson sequencing to ensure that this unit supported students through a clear, coherent and “gradual development of knowledge, skills and attitude” (Killen, 2016, p. 83) underpinned by quality teaching and higher-order thinking. To safeguard this focus on literacy development and assessment, I utilised backward mapping from Year 7’s summative, cross-curricular assessment task in Term 4, in which they are challenged to create a physical artefact and write an analytical monologue about their chosen historical source (APST 2.3.1).

To facilitate active student participation and engagement in learning, I consistently embedded effective teaching strategies and differentiation throughout lesson sequencing, in accordance with students’ individualised needs, learning preferences and competencies (APST 3.2.1). As accentuated in Part 1A, I found that the development of a class routine and utilisation of dialectical pedagogy was very beneficial for students in 7HISE, as it offered them with an explicit overview of the activities of the lesson, and an understanding of the importance of lesson content in relation to their overall unit. A foundational part of this pedagogical approach included the employment of frequent worked exemplars, teacher modelling and scaffolds, which afforded students the opportunity to engage in tangible learning experiences towards a fixed goal (Foreman & Arthur-Kelly, 2017), and as such, they were integrated in many of my lesson plans (APST 3.2.1). Alongside such goal-setting, my lesson also provided all students with opportunities for collaboration, experimentation and reflection, as well as extension activities for early finishers and gifted students.

LESSON PLAN FOR LESSON 1

The Faculty of Education and Arts – The School of Education

SECONDARY EDUCATION: HSIE LESSON PLANS

Lesson Title: Analysing Historical Sources Syllabus: Stage 4, Year 7 (History)	Date: 11/08/2022 (Period 3) Duration: 60 Minutes
Syllabus Outcomes: - HT4-5: Identifies the meaning, purpose and context of historical sources - HT4-8: Locates, selects and organises information from sources to develop an historical inquiry	
Learning Outcomes: By the end of the lesson, students will be able to: - Explain why analysing historical sources is important; and - Collaboratively deconstruct and analyse historical sources.	
Introduction (10 MINUTES): ➤ Settle the class – prompt students to sit quietly, organise their resources (by getting the relevant OneNote page up on their devices or writing the heading in their books) and be prepared to listen to the lesson overview. ➤ Previous lesson review – articulate that as we started to look at last lesson, we are taking a deep dive and commencing our exploration into the types of historical sources and evidence that historians and other experts use in their investigation of key events, individuals and places from the past. In particular we started to identify the TWO main types of sources that historians collect and analyse – PRIMARY and SECONDARY sources. We also discussed some different kinds of historical sources that are useful to historians such as photographs, human remains, documentaries, newspaper articles, archaeological site etc. ➤ Today – convey that they will be encouraged to continue to further our knowledge about the usefulness of historical sources, by taking on the role of historians and analysing some sources for ourselves (using a very helpful sequence of inquiry questions). ➤ Articulate lesson significance – articulate that the information that we cover today will form the basis of our knowledge about the different types of historical sources used by historians and other experts in their study of History. The skills of source analysis that we will begin to develop today will also help us in our investigation of some significant events and societies from Ancient and Modern History in our upcoming units next term and into the later years.	
Teacher Activities: INTRODUCTORY REVISION ACTIVITY – 10 MINUTES: ➤ Following the teacher's explicit articulation of the lesson overview and its connectedness to prior and upcoming lessons, the teacher will present the class with a series of images of <i>Historical Sources</i> related to the ancient site of Pompeii (a topic identified as of student interest in previous lessons). This PowerPoint presentation of historical sources encompasses a diversity of photographs taken at Pompeii by the teacher. These images depict a selection of both primary and secondary sources such as archaeological sites, tourist walkways, modern signage and human remains.	Student Activities: ➤ Students are encouraged to observe the images of <i>Historical Sources</i> exhibited in the teacher-prepared PowerPoint presentation. During this time, they are also challenged to reflect upon their prior knowledge of primary and secondary sources to verbally contribute to the class discussion about the different types and kinds of sources presented.

Key focus area/
skill in stage 4
curriculum
(APST 2-3-1)

APST 3-1-1

Class routine
(APST 1-2-1 and 3-2-1)

- With each image presented via the projector, the teacher will facilitate a brief **class discussion** in relation to the following questions:
What can I see?
What TYPE of source is this?
What KIND of source is this?
How do we know that this is a PRIMARY or SECONDARY source?

INTRODUCTORY DISCUSSION & VIDEO – 10 MINUTES:

- Upon completion of this revision exercise, the teacher briefly articulates that this activity has already provided students with a glimpse into the types of questions that historians and other experts have to ask themselves when they come into contact with historical sources, and this process of asking questions is known as *Source Analysis*.
- The teacher will then read the brief introduction titled *What is Source Analysis?* Or nominate a strong verbal contributor to read. This short passage utilises simplified language to offer students a definition of source analysis and what is involved. It also introduces them to the 6 W's of source analysis, which will form the basis of their source analysis knowledge and skill development.
- Students will then be presented with a short **YouTube video** outlining the steps involved in source analysis, and during this time, they are challenged to utilise the information presented to **complete the Six Analysis Skills table** included on their OneNote.
 During this time, the teacher may choose to transcribe the required words on the classroom whiteboard or pause the video to support student learning.

YouTube Video: <https://www.youtube.com/watch?v=TIJwiRz-t0A&t=1s>

WORKED EXEMPLAR AND CLASS DISCUSSION – 15 MINUTES:

- Following the video, students may be encouraged to share these *Six Analysis Skills* with the class and read aloud the associative guiding questions.
- The teacher will then articulate that the class will work together to have a go using these *Six Analysis Steps* and guiding questions to analyse a historical source that provides us with some useful knowledge about life in Pompeii.
- The teacher then presents students with *Source 1: The Odeon (right), Pompeii* (available on the class OneNote) and read aloud the given passage to the class. **Using the Source Analysis Table provided, students are then guided through their collaborative analysis of this given source with the teacher asking the guiding questions under each step and inviting students to share their answers with the class.**

APST 3.1.1 and 3.2.1

- Students are initially prompted to listen quietly to the teacher's brief introduction of source analysis.
- They are then encouraged to observe the YouTube video presented and utilise the information presented to **complete their Six Analysis Skills tables available on their class OneNote.**

APST 1.2.1 and 3.2.1

- The blue highlighting captures the planning of differentiated learning activities that accommodate for the diverse needs and preferences of students (i.e. visual, oral, kinesthetic etc.).
- Also the use of visual aids, scaffolds, worked exemplars and collaborative exercises to support student participation & engagement.

- Students are prompted to share their findings from the video with the class, before being encouraged to momentarily listen to the overview of *Source 1* articulated by the teacher.
- The class is then challenged to **work collaboratively** to analyse the given source using the *Six Analysis Skills* and guiding questions presented in the associative table on their OneNote. Throughout this process, they are encouraged to ask questions and share their conclusions with the class, to collaboratively complete the analysis tables provided in their own copy of the OneNote page.

Continuation of class routine (APST 1.2.1)

SMALL GROUP SOURCE ANALYSIS – 10 MINUTES:

- Upon conclusion of the collaborative worked exemplar, students are presented with TWO historical sources and challenged to **work in pairs to analyse ONE of the sources by completing the Source Analysis Tables provided** (the same tables as utilised in the prior activity).
- During this time, the teacher will circulate the classroom to support students' completion of this exercise, as well as informally assess their understanding of source analysis.
- Divided into pairs, students are challenged to utilise their knowledge of source analysis and the *Six Analysis Skills* provided to work collaboratively in analysing ONE of the historical sources presented to them. Their responses to the guiding questions are to be transcribed in the associative sections of the table available on OneNote.
- Any early finishers are challenged to have a go completing **the Extension Activity** available on OneNote, in which they are prompted to **write a PEEL paragraph explaining why one of the sources that they have analysed is useful to historians studying this aspect of history.** **APST 3.1.1**

Closure (5 MINUTES):

- In the last 5 minutes of the lesson, the teacher will refocus student attention and encourage a few students to share their analysis with the class.
- The teacher will then briefly draw students' attention back to the Success Criteria of the lesson, and challenge students to verbally explain what source analysis is and why it is important to the study of History. Students will also be verbally praised for their efforts in analysing historical sources.
- Students are then encouraged to pack up and stand behind their chairs to be dismissed at the conclusion of the lesson.

Formal Assessment:

- Cross-Curricular Task (with English) due Week 7, Term 4 – *create a physical artefact and write a recorded monologue regarding this historical source.*

Differentiation:

APST 3.1.1 and 3.2.1

CORE:

- Introductory revision of foundational content from previous lesson affords all students an opportunity to **revise their knowledge, ask questions and resolve any concerns or gaps in understanding** they may have prior to the application of this knowledge and skills in the remainder of the lesson activities.
- **Differentiation of learning activities** accommodates for the diverse learning styles and preferences of all students (including visual and kinaesthetic learners, as well as those that value written passages, video explanations and worked exemplars).

STRUCTURED:

- Students are provided with **worked exemplars that present visual examples of quality responses** for the summary table activity.
- The structured nature of the **Source Analysis Table with associative questions and explicit headings** also offers all students a **series of sequential steps** to follow in their analysis of historical sources.
- By **pairing students of lower and higher ability together** (based on CogAT data), all students are afforded an opportunity to vocalise their understanding and ask questions from their peers in small and supportive learning groups. Gifted students are also challenged to deconstruct and explain the knowledge behind their conclusions to their peers.

EXTENSION:

- The **diversity of source types presented and the teacher's allocation of these more difficult sources to gifted students** affords these students the opportunity to **progress towards higher-order thinking** without explicitly needing to ask for additional resources.
- The **extension activity available** to all students also challenges students to consolidate their newfound understanding of source analysis and their developing analytical skills to communicate why ONE of their sources is useful to historians. This exercise also prompts students to deconstruct these conceptual understandings and communicate their comprehension in a new form, by writing an analytical PEEL paragraph with reference to their historical source.

Analysing Historical Sources

LEARNING INTENTION

To list a range of sources used by archaeologists and historians in historical investigations.

SUCCESS CRITERIA

I can understand why analysing historical sources is important.

I can analyse a historical source.

HISTORICAL SOURCES

REVISION:

Explore the 'Historical Sources' images. For each image, **answer** the following questions.

1. What can I see?
2. What TYPE of source is this?
3. What KIND of source is this?
4. How do we know that this is a PRIMARY or SECONDARY source?

WHAT IS SOURCE ANALYSIS?

Source analysis is the ability to understand all the elements that contribute to the creation of a historical source. **All historical sources were created for a reason.** By **asking a series of questions**, historians and other experts can discover WHY specific historical sources came into existence, and what they reveal about a particular aspect of the past.

When asking questions and analysing sources, it is important to remember the 6 W's:

WHO?

WHAT?

WHEN?

WHERE?

WHY?

HOW?

How to Analyse Historical Sources

<https://www.youtube.com/watch?v=TIJwiRz-t0A&t=1s>

Watch 'How to Analyse Historical Sources' and **complete** the left-hand column of the table.

The Six Analysis Skills	Guiding Question
I	What historical topics or ideas represented in this source? <i>What can I see? What is missing?</i>
O	Who created this source? <i>What was their name/s?</i>
P	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? <i>What is the author's background? (Consider their education, occupation, social class, political and religious beliefs etc.)</i>
C	When was this source created? Where did this source originate? What was happening at this time?
A	Who was the intended audience of the source?
M	What was the intended purpose of this source? <i>Why was this source created?</i>

SOURCE 1: The Odeon (right), Pompeii.

Pompeii had two theatres. The Large Theatre (left) seated up to 5000 people, and was used to hold comedies, tragedies and big religious festivals or performances. The Odeon (or small covered theatre) seated up to 2500 people, and was used for smaller concerts, lectures and poetry readings.

The Odeon was built in the early years of settlement in around 79 BC (as shown by an inscription by the two local magistrates, Marcus Porcius and Caius Quinctius Valgus who requested its construction).

CLASS DISCUSSION AND EXAMPLE:

Using the historical source presented above, **discuss** the Guiding Questions and **complete** the source analysis table below.

SOURCE 1: The Odeon

	Guiding Questions	Analysis Notes
INFORMATION	What historical topics or ideas represented in this source? What can I see? What is missing?	Two ancient, stone theatres. They were called the Odeon and the Large Theatre. However, it is missing the people – the local society.
ORIGIN	Who created this source? What was their name/s?	The Odeon was constructed by the people of Pompei and requested by two Roman magistrates – Marcus Porcius and Caius Quintus Valgus.
PERSPECTIVE	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? What is the author's background? (Consider their education, occupation, social class, political/religious beliefs etc.)	It is a primary/secondary source and it is a photograph.
CONTEXT	When was this source created? Where did this source originate? What was happening at this time?	
AUDIENCE	Who was the intended audience of the source?	
MOTIVE	What was the intended purpose of this source? Why was this source created?	

PAIRED SOURCE ANALYSIS:

In pairs, **analyse** ONE of the sources provided to **complete** the source analysis table.

SOURCE _____:

	Guiding Questions	Analysis Notes
INFORMATION	What historical topics or ideas represented in this source? What can I see? What is missing?	
ORIGIN	Who created this source? What was their name/s?	
PERSPECTIVE	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? What is the author's background? (Consider their education, occupation, social class, political/religious beliefs etc.)	
CONTEXT	When was this source created? Where did this source originate? What was happening at this time?	
AUDIENCE	Who was the intended audience of the source?	
MOTIVE	What was the intended purpose of this source? Why was this source created?	

EXTENSION ACTIVITY:

Select ONE of the sources you analysed above.

Explain why this source would be **USEFUL** to historians, who are investigating this particular event or society from the past.

LESSON PLAN FOR LESSON 2

Lesson Title: Formative Task on Ned Kelly Syllabus: Stage 4, Year 7 (History)	Date: 12/08/2022 (Period 3) Duration: 60 Minutes
Syllabus Outcomes: - HT4-5: Identifies the meaning, purpose and context of historical sources. - HT4-6: Uses evidence from sources to support historical narratives and explanations. Learning Outcomes: By the end of the lesson, students will be able to: - Develop a conclusion as to the usefulness and reliability of previously unseen sources; - Independently deconstruct and analyse historical sources; - Explicitly reference information from the historical sources provided (using the 6 W's of source analysis); - Argue their point of view in a clear and coherent manner (ideally using the PEEL paragraph structure).	
Introduction (10 MINUTES): ➤ Settle the class – prompt students to sit quietly, organise their resources (by getting the relevant OneNote page up on their devices or writing the heading in their books) and be prepared to listen to the lesson overview. ➤ Previous lesson review – articulate that as we have started to explore over the past few lessons, there are many kinds of historical sources that historians and other experts use in their investigation of the past. As a part of their investigation, historians must analyse these sources using 6 W's of source analysis (our inquiry questions) and the Six Analysis Skills. Once historians have successfully analysed these sources, they can be selected and used as evidence to strengthen historical arguments or draw conclusions about aspects of history. ➤ Today – convey that they will be encouraged to continue to further our skills of historical inquiry and source analysis, by exploring some historical sources related to Ned Kelly in a Formative Writing Task. However, we will be going one step beyond our analysis, as we will also be challenged to draw our own conclusions about the usefulness and reliability of these sources by writing a PEEL paragraph comparing the information presented. ➤ Articulate lesson significance – articulate that just as we were starting to develop our analytical skills last lesson, we are beginning the next step in a historical investigation by drawing our own conclusions and using the information from these sources as evidence to support our arguments. Being able to have your own perspective and communicate that is a very important life skill, especially the ability to be able to back up your arguments with relevant evidence.	
Teacher Activities: DECONSTRUCTION OF FORMATIVE TASK – 5 MINUTES: ➤ The teacher will briefly distribute all students with a hard-copy of the Formative Task that includes: the designated rubric; goal-setting reflection activity; the task description with writing space; and the TWO relevant sources. ➤ Presenting the OneNote page <i>Formative Task on Ned Kelly</i> via the projector, the teacher will briefly read aloud the class description, before articulating that students have 1 MINUTE to discuss with the person next to them and write down a response to the following question: <i>How can sources be both 'supporting' and 'conflicting'?</i>	Student Activities: ➤ Students are prompted to transcribe their name on their hard-copy of the Formative Task, as they are being distributed. ➤ They are also initially encouraged to actively listen whilst the teacher unpacks the requirements of the task and ask questions as necessary. ➤ Students are then challenged to work collaboratively to respond to a given question and transcribe their response down in the allocated space on their OneNote.

CLASS routine (APST 1-2-1 and 3-2-1)

literacy support for those with learning difficulties

APST 3-1-1

APST 2-3-1

- Students are then invited to share their conclusions with the class, as the teacher transcribes appropriate responses down on the projected OneNote.
- The teacher then briefly reads aloud the definition of *ARGUE* and the brief sequence of how to approach the task, addressing any questions students may have about the task so far.

WORKED EXEMPLAR (SOURCE ANALYSIS) – 10 MINUTES:

- Upon conclusion of the initial deconstruction of the task requirements, the teacher will read aloud *Source A* or encourage a strong verbal contributor to read the passage.
- Following this initial reading, the teacher will guide students through a collaborative analysis of *Source A* using the familiar *Source Analysis* table provided.

APST 3.1.1
through modelling + repetition of scaffolds.

INDEPENDENT/SMALL GROUP SOURCE ANALYSIS – 10 MINUTES:

- Students are then challenged to work either independently or collaboratively to analyse *Source B* (presented in their hard-copy of the task) using the *Source Analysis* table provided.
- The teacher may wish to utilise a visual classroom timer for 10 MINUTES to support student learning and ensure the class has sufficient time remaining in the lesson for students' completion of the writing task.

responsive to student needs

- Students are collectively challenged to work collaboratively to analyse a given source using the *Six Analysis Skills* and guiding questions presented in the associative table on their OneNote. Throughout this process, they are encouraged to ask questions and share their conclusions with the class, to collaboratively complete the analysis tables provided in their own copy of the OneNote page.

- Working either independently or in small groups, students are encouraged to analyse *Source B* of the task and transcribe their analytical notes in the associative sections of their *Source Analysis* tables on their OneNote.

APST 3.1.1 (and 1.2.1)
with use of timer/s to prompt organisation and structure.

INDEPENDENT WRITING TASK – 20 MINUTES:

- Once students have analysed both of the given sources, they are challenged to use this information to answer the given question in a PEEL paragraph. This response is to be hand-written to facilitate students' development in handwriting and written communication.
- During this time, the teacher is to circulate the classroom and offer individualised assistance to students as seen necessary. This may include scaffolding their responses with sentence starters.
- **Note:** A writer's aid from Learning Support was made available in advance to write for *Student H*, who struggles to write independently for extended writing tasks.

APST 3.2.1 (and 1.2.1)

- Finally, students are challenged to independently utilise the information they have gathered from *Source A* and *B* to write a PEEL paragraph responding to the following question:

On 26th October 1878, the bushranger Ned Kelly shot and killed unarmed police constable named Lonigan at Stringybark Creek in Victoria. Sources A and B are supporting conflicting sources.

Argue which source is more useful and reliable in understanding the events of 26th October 1878. In your answer, you must refer to the 6 W's of source analysis.

Question created in alignment with Stage 4 assessment

(APST 2.3.1)

Closure (5 MINUTES):

- In the last 5 minutes of the lesson, the teacher will encourage students to finish the sentence/thought that they are on, and briefly proof-read their response for grammatical errors. Student attention will then be refocused, and the teacher will collect students' hard-copy responses for marking.
- Students are then encouraged to pack up and stand behind their chairs to be dismissed at the conclusion of the lesson.

APST 3.2.1
→ self-assessment for students.

Formal Assessment:

- Cross-Curricular Task (with English) due Week 7, Term 4 – create a physical artefact and write a recorded monologue regarding this historical source.

Differentiation:

APST 3.1.1 and 3.2.1

CORE:

- Introductory revision of foundational content from previous lesson affords all students an opportunity to revise their knowledge, ask questions and resolve any concerns or gaps in understanding they may have prior to the application of this knowledge and skills in the remainder of the lesson activities.
- The initial deconstruction of the task requirements and terminology evaluation accommodates for the diverse learning needs and literacy competencies of all students, by ensuring all learners have a clear understanding of the subject-specific and directive vocabulary used in the task description, and in turn, deep knowledge of the expectations of students' achievement of this task.

STRUCTURED:

- Students are provided with a worked exemplar that present visual examples of quality responses for the summary table activity.
- The structured nature of the Source Analysis Table with associative questions and explicit headings also offers all students a series of sequential steps to follow in their analysis of historical sources.
- By affording opportunities for students of lower and higher ability to work together, all students are afforded an opportunity to vocalise their understanding and ask questions from their peers in small and supportive learning groups. Gifted students are also challenged to deconstruct and explain the knowledge behind their conclusions to their peers.

EXTENSION:

- The nature of this task afforded more gifted students an opportunity to communicate the extent of their conceptual knowledge and further their analytical skills in the analysis of previously-unseen, historical sources.
- This Formative Task also challenges them to cultivate higher-order thinking, as they are prompted by the question to present a comparative argument as to the usefulness and reliability of these given sources and make a judgement. They are also challenged to support their historical conclusions with reference to given historical sources, and refine their writing skills using an analytical PEEL paragraph structure.

Formative Task on Ned Kelly

THE TASK:

Answer the following question:

On 26th October 1878, the bushranger Ned Kelly shot and killed unarmed police constable named Lonigan at Stringybark Creek in Victoria. Sources A and B are supporting conflicting sources.

Argue which source is more useful and reliable in understanding the events of 26th October 1878. In your answer, you must refer to the 6 W's of source analysis.

How can sources be both 'supporting' and 'conflicting'?

What does it mean to 'Argue'?

Argue means to **give reasons** or **cite evidence** in support of an idea, action or theory, typically with the aim of persuading others to share one's view.

So what do I need to do?

1. **Read** and **analyse** Source A and B using the following Analysis Tables below
2. **Decide** which source is MORE useful and reliable in understanding the events of 26th October 1878.
3. **Explain** how you came to this conclusion.
 - a. Make sure you **refer to BOTH Source A and B** in your response.

SOURCE A:

I was unarmed...I saw the man...shoot Lonigan who had no time to get under cover or draw his revolver... Kelly is the man who fired the shot which killed Lonigan.

From the statement by Constable McIntyre at the trial of the bushranger Ned Kelly, for the murder of Constable Lonigan. 19th October 1880, Melbourne.

Source A:

	Guiding Questions	Analysis Notes
INFORMATION	What historical topics or ideas represented in this source? What can I see? What is missing?	
ORIGIN	Who created this source? What was their name/s?	
PERSPECTIVE	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? What is the author's background? (Consider their education, occupation, social class, political/religious beliefs etc.)	
CONTEXT	When was this source created? Where did this source originate? What was happening at this time?	
AUDIENCE	Who was the intended audience of the source?	
MOTIVE	Why was this source created? What was the intended purpose of this source?

LESSON PLAN FOR LESSON 3

Lesson Title: Source Analysis Revision Syllabus: Stage 4, Year 7 (History)	Date: 16/08/2022 (Period 4) Duration: 60 Minutes
Syllabus Outcomes: - HT4-5: Identifies the meaning, purpose and context of historical sources. - HT4-6: Uses evidence from sources to support historical narratives and explanations. Learning Outcomes: By the end of the lesson, students will be able to: - Develop a conclusion as to the usefulness and reliability of previously unseen sources; - Explicitly reference information from the historical sources provided (using the 6 W's of source analysis).	
Introduction (10 MINUTES): Class routine (APST 1-2-1 and 3-2-1) ➤ Settle the class – prompt students to sit quietly, organise their resources (by getting the relevant OneNote page up on their devices or writing the heading in their books) and be prepared to listen to the lesson overview. ➤ Previous lesson review – articulate that as we have started to explore over the past week or so, there are many kinds of historical sources that historians and other experts collect and analyse as part of the process of historical inquiry into specific aspects of history. In particular, we looked at how we can best analyse these sources and gather evidence to support our historical arguments, especially the importance of the 6 W's or our guiding questions and the six analysis skills. To finish off last week, you were set the challenge of analysing some previously-unseen historical sources about Ned Kelly for yourself and using this information to develop your own historical assessment as to the usefulness and reliability of these sources. ➤ Today – convey that students' formative assessment tasks have been marked and will be returned to them very shortly. In marking their paragraphs, there were a couple of common themes that many people struggled with, and as such, we will be clarifying those concerns and refining our source analysis skills throughout today's lesson, with the collaborative completion of a similar writing task. ➤ Articulate lesson significance – articulate that just as we were starting to develop our analytical skills last week, we are using the feedback we have been given today to set some personal goals for our writing moving forward and using our last Formative Task as a foundation for improvement in our writing. Also reinforce the understanding that this practice of reflection and improvement following assessment tasks (whether informal or formal) is a great strategy for learning that ensures we can continue to improve and strive for excellence, so that we know that each time we submit an Assessment Task it is our best possible work.	
Teacher Activities: DECONSTRUCTION OF TASK – 5 MINUTES: ➤ Presenting the OneNote page <i>Source Analysis Revision</i> via the projector, the teacher will briefly read aloud the class description. ➤ The teacher then briefly reads aloud the definition of <i>ARGUE</i> and articulates that many students struggled addressing this verb. It is asking you to put forward your idea as to which source – Source A or B – is MORE useful and MORE reliable. <i>APST 2-3-1 → use of reporting knowledge for prior assessments.</i> It may be beneficial to also explicitly articulate for students that an argument or their point of view must be supported by evidence from BOTH sources (Source A and B), and providing a reason why. For example,	Student Activities: ➤ Students are initially prompted to follow along as the teacher reads aloud the task description and deconstructs key terminology. ➤ They are then encouraged to independently research the terms USEFUL and RELIABLE using their electronic devices, and transcribe down a definition for each in their own words (in the space provided on their copy of the OneNote page). ➤ During this time, students are challenged to support their own learning by asking questions and taking additional notes as deemed necessary.

} APST 3-1-1

APST 2.3.1 → use of assessment for reflection & future planning.

"Source A is more useful in understanding ... because it provides us with additional information about ... in comparison to Source B."

- Students are then encouraged to **research** the terms USEFUL and RELIABLE and **transcribe down a definition in their own words** (in the space provided on the OneNote page).
- The teacher will then read aloud the **brief sequence of how to approach the task**, addressing any questions students may have so far.

WORKED EXEMPLAR (SOURCE ANALYSIS) – 10 MINUTES:

- Upon conclusion of the initial deconstruction of the task requirements, the teacher will read aloud *Source A* or encourage a strong verbal contributor to read the passage.
- Following this initial reading, the teacher will guide students through a **collaborative analysis of Source A** using the familiar *Source Analysis* table provided.

THINK, PAIR, SHARE (SOURCE ANALYSIS) – 10 MINUTES:

- Once the teacher has **set a timer** for 3 MINUTES presented via the projector, students are challenged to **work independently** to analyse Source B using the *Source Analysis* table provided.
- Upon conclusion on the timer, the teacher will prompt students to form their **small 'expert' groups to share their analysis**, resetting the timer for an additional 3 MINUTES.
- After the end of this second timer, the teacher will challenge each group to share their analysis of Source B with the class, being sure to address any misconceptions, questions or discrepancies students may have.
- During this **class discussion**, the teacher will **transcribe relevant student responses into the associative passages of the Source Analysis table** and encourage students to add any additional notes to their own copies.

RETURN OF NED KELLY FORMATIVE TASK – 5 MINUTES:

- Upon completion of the class discussion, the teacher will distribute students' marked and annotated Formative Assessment tasks (Ned Kelly) that were completed last lesson, and offer them an opportunity to ask questions, read their given feedback and set two relevant goals for their future writing.

COLLABORATIVE PARAGRAPH WRITING – 15 MINUTES:

- Once students have had an opportunity to read the feedback and set their writing goals, the teacher will **redirect student attention back to the recommended sequence** for approaching this task and highlight students'

- Students are challenged to work collaboratively to analyse a given source using the *Six Analysis Skills* and guiding questions presented in the associative table on their OneNote. Throughout this process, they are encouraged to ask questions and share their conclusions with the class, to **collaboratively complete the analysis tables provided in their own copy of the OneNote page**.

- All learners are firstly challenged to work independently to analyse Source B using the information and scaffold provided.
- As prompted, students are then encouraged to formulate their small 'expert' groups and share their analysis with their peers, working together to collaboratively complete their *Source Analysis* tables.
- As a final part of this exercise, students are invited to share their analytical notes with the class and contribute to the collective completion of the analysis table.

- Upon receiving their marked Formative Assessment Task, students are encouraged to read through the given feedback and comments from their teacher, ask questions as needed, and reflect upon their efforts in this task.
- Using this information, all learners are challenged to **develop TWO learning goals for their future writing, reflective of teacher feedback**. APST 2.3.1

- Students are presented with the option of either challenging themselves to **complete the final writing task independently, or verbally contribute to the**

APST 1.2.1 and 3.1.1

achievement of the first step. The teacher will also express that students' next step is to decide which of the two sources is MORE useful and reliable and why.

- The teacher will articulate that once students have made that decision, they are to plan their response using the PEEL paragraph structure, whilst drawing students' attention to the visual on the class OneNote.
- Asking students a series of questions (see examples below), the teacher then guides student completion of this heavily scaffolded writing task as necessary.

Effective Questioning Examples:

Point/Topic Sentence – "Can someone raise their hand and identify for the class, which of the two sources – either Source A or Source B – they decided was MORE useful in understanding the events of this day"

Explanation – "Did anyone else in the room have the same answer?"
If so, "Can you explain for us why you believe that Source ___ was more useful?"

Evidence – "Does anyone have an argument as to how Source ___ is more useful/reliable than Source ___? What evidence do we have from our sources to show/support that?"

class' collaborative paragraph writing by considering and answering a series of questions.

- Throughout this process, students are prompted to transcribe down the sentences developed alongside the teacher on the classroom projector, and/or create their own analytical sentences with teacher support.

APST 3.2.1

Closure (5 MINUTES):

- In the last 5 minutes of the lesson, the teacher will refocus student attention and challenge them to re-read their TWO goals for future writing developed earlier in the lesson. Using this information, students are prompted to write TWO Success Criteria statements (e.g. I can ...) on the back of their Formative Assessment Tasks, stating two new understandings or skills that they achieved in this lesson.
- The teacher will then collect students' hard-copy responses for use in future lessons.
- Students are then encouraged to pack up and stand behind their chairs to be dismissed at the conclusion of the lesson.

APST 2.3.1 and 3.1.1

Formal Assessment:

- Cross-Curricular Task (with English) due Week 7, Term 4 – create a physical artefact and write a recorded monologue regarding this historical source.

Differentiation:

APST 3.1.1 and 3.2.1

CORE:

- Introductory revision of foundational content from previous lesson affords all students an opportunity to revise their knowledge, ask questions and resolve any concerns or gaps in understanding they may have prior to the application of this knowledge and skills in the remainder of the lesson activities.
- The initial deconstruction of the task requirements and terminology evaluation accommodates for the diverse learning needs and literacy competencies of all students, by ensuring all learners have a clear understanding of the subject-specific and directive vocabulary used in the task description, and in turn, deep knowledge of the expectations of students' achievement of this task.

STRUCTURED:

- Students are provided with a worked exemplar that present visual examples of quality responses for the summary table activity.
- The structured nature of the Source Analysis Table with associative questions and explicit headings also offers all students a series of sequential steps to follow in their analysis of historical sources.

- By affording opportunities for students of lower and higher ability to work together, all students are afforded an opportunity to vocalise their understanding and ask questions from their peers in small and supportive learning groups. Gifted students are also challenged to deconstruct and explain the knowledge behind their conclusions to their peers.
- The timed nature of the 'Think, Pair, Share' activity also sets clear learning goals for all students within a given time frame, to encourage student motivation and participation in this activity, as they work towards a common goal. The independent aspects of this task affords the teacher an opportunity to informally assess students' individual comprehension of the task, and support student learning on a personal scale. It also offers students examination-like conditions, as they only a offered an explicit timeframe in which to attempt the task.
-

EXTENSION:

- The nature of this task afforded more gifted students an opportunity to communicate the extent of their conceptual knowledge and further their analytical skills in the analysis of previously-unseen, historical sources.
- This Formative Task also challenges them to cultivate higher-order thinking, as they are prompted by the question to present a comparative argument as to the usefulness and reliability of these given sources and make a judgement. They are also challenged to support their historical conclusions with reference to given historical sources, and refine their writing skills using an analytical PEEL paragraph structure.

APST 2-3-1 → as the last lesson in this sequence, this particular lesson was designed as a re-teach opportunity following teacher marking of students' Formative Assessment Task.

LESSON 3 MATERIALS: ONENOTE PAGE 'SOURCE ANALYSIS REVISION'

Source Analysis Revision

THE TASK:

Answer the following question:

Before dawn on 25th April 1915, an fleet of ships assembled off the Gallipoli peninsula to land thousands of Australian and New Zealand troops on the Turkish beaches. Sources A and B are supporting conflicting sources.

Argue which source is more useful and reliable in understanding the events of 25th April 1915. In your answer, you must refer to the 6 W's of source analysis.

What does it mean to 'Argue'?

Argue means to **give reasons** or **cite evidence** in support of an idea, action or theory, typically with the aim of persuading others to share one's view.

What does useful mean? What does reliable mean?

USEFUL -

RELIABLE -

So what do I need to do?

1. **Read** and **analyse** Source A and B using the following Analysis Tables below
2. **Decide** which source is MORE **useful** and **reliable** in understanding the events of 26th October 1878.
3. **Explain** how you came to this conclusion.
 - a. Make sure you **refer to BOTH Source A and B** in your response.

SOURCE A:

"It was a still night. There was hardly a breath of wind. Every sound seemed magnified tenfold and it seemed impossible that the noise of our boat hoists could escape being heard by the enemy a few miles away. We eagerly scanned the direction of the shore, the loom of which could just be seen, to see if we could detect any movement, but all was still."

A reflection from Admiral Cecil Thursby, who commanded the landing of the 2nd Squadron at Gallipoli, and gave this statement many years later.

Source from: <https://anzacportal.dva.gov.au/wars-and-missions/ww1/where-australians-served/gallipoli/landing-anzac-cove>

Source A:

	Guiding Questions	Analysis Notes
INFORMATION	What historical topics or ideas represented in this source? What can I see? What is missing?	
ORIGIN	Who created this source? What was their name/s?	
PERSPECTIVE	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? What is the author's background? (Consider their education, occupation, social class, political/religious beliefs etc.)	
CONTEXT	When was this source created? Where did this source originate? What was happening at this time?	
AUDIENCE	Who was the intended audience of the source?	
MOTIVE	Why was this source created? What was the intended purpose of this source?	

SOURCE B:

"At 2 am the moon was still shining. The patrols on duty from my reserve platoon were Idris from Biga and Cennil from Gallipoli. They reported having sighted many enemy ships in the open sea... I saw them as a great mass which, I decided, seemed to be moving straight towards us. In the customary manner, I went to the phone to inform divisional headquarters. That was about 2.30 am I got through to the second in command, Lieutenant Nori, and told him of it... A little while later, the moon sank below the horizon and the ships became invisible in the dark. The reserve platoon was alerted and ordered to stand by. I watched and waited."

A statement from Lieutenant Colonel, Sefik Aker, of the Turkish 27th Regiment. He reports his observations of the ANZAC boats approaching, from his lookout on the Ari Burnu headland at the northern end of Anzac Cove.

Source from: <https://anzacportal.dva.gov.au/wars-and-missions/ww1/where-australians-served/gallipoli/landing-anzac-cove>

Source B:

	Guiding Questions	Analysis Notes
INFORMATION	What historical topics or ideas represented in this source? What can I see? What is missing?	
ORIGIN	Who created this source? What was their name/s?	
PERSPECTIVE	What TYPE and KIND of source is it? What perspective does the author/creator of this source have? What is the author's background? (Consider their education, occupation, social class, political/religious beliefs etc.)	
CONTEXT	When was this source created? Where did this source originate? What was happening at this time?	
AUDIENCE	Who was the intended audience of the source?	
MOTIVE	Why was this source created? What was the intended purpose of this source?	

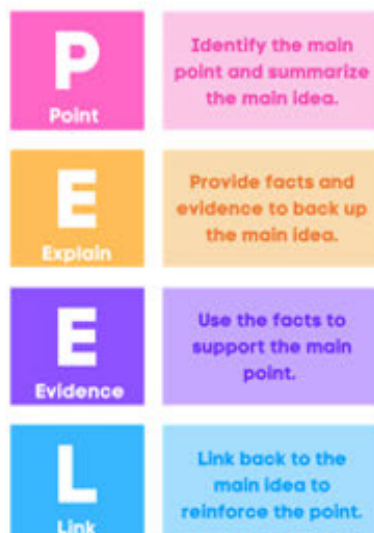

THE TASK:

Answer the following question:

Before dawn on 25th April 1915, an fleet of ships assembled off the Gallipoli peninsula to land thousands of Australian and New Zealand troops on the Turkish beaches. Sources A and B are supporting conflicting sources.

Argue which source is more useful and reliable in understanding the events of 25th April 1915. In your answer, you must refer to the 6 W's of source analysis.

TEACHING FOR LEARNING (1.3.1, 1.5.1, 2.5.1, 4.1.1, 4.2.1, 6.3.1):

QUALITY TEACHING PRACTICE:

During the final weeks of internship, one of my lessons was coded for its alignment to the Quality Teaching Model, conducted by a Tertiary Supervisor from the university. This particular lesson took place during the first week of Year 7's new History topic: *The Asian World – Early Imperial China*.

As this is a very condensed unit of work – limited to the last three weeks of term – I worked to modify and expand upon the existing program, to ensure that this topic still challenged students to apply their newfound knowledge and skills of historical inquiry through a guided exploration of this ancient civilisation. In particular, I found the continuity of the class routine and organisation of learning activities (mentioned above) fundamental. It safeguarded student autonomy and comfort within the class environment despite the transition into a new and unfamiliar topic (APST 4.2.1). Initially articulating lesson significance and commencing with skill-based revision activities was an effective strategy that was inclusive and responsive to the learning strengths and needs of all students in 7HISE, as it afforded all learners opportunities to demonstrate their prior knowledge and apply their developing skills in new contexts, relevant to the conceptual material of the new unit (Gore, 2001) (APST 1.3.1).

As a class, 7HISE really engaged with collaborative inquiry-based exercises that required higher-order thinking, substantive communication and problem-solving, and therefore I accommodated for this throughout my History lessons to safeguard students' active participation and engagement. This is especially evident in this lesson as the opening timeline activity challenged students to work in their small 'expert' groups to organise a series of historical events from ancient Chinese history in chronological order and to reorganise this information depending on personal interest. I found that this pedagogical approach not only encouraged students to become "more reliant on their own ability to think and seek information from other sources [beyond the teacher]" (Killen, 2016, p. 187), but also offered them opportunities to have their prior and cultural knowledge acknowledged, utilised and validated within the learning processes of the lesson, as they share their metacognitive strategies and concomitant values with their peers (APST 1.3.1 and 4.1.1).

TERTIARY SUPERVISOR VISIT - QUALITY TEACHING MODEL FRAMEWORK

College of Human & Social Futures

LESSON OBSERVATION DATE: 9/09/2022	TERTIARY SUPERVISOR NAME: [REDACTED]	LESSON/CLASS OBSERVED: Year 7 History
STUDENT NUMBER: [REDACTED]	STUDENT FIRST NAME: [REDACTED]	STUDENT LAST NAME: [REDACTED]
SCHOOL/SERVICE NAME: SAN CLEMENTE HIGH SCHOOL	PLACEMENT DATES: 18/07/2022 - 23/09/2022	COURSE CODE: [EDUC4197] QT and Professional Practice

INTELLECTUAL QUALITY

ELEMENT	CODING SCORE	CODING NOTES
1.1 Deep knowledge	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent is the knowledge being addressed focused on a small number of key concepts and the relationships between and among concepts? Focus in the lesson on historical measurements of time. Timelines and representations of time. Clear sequence of activities, all of which involved students in developing understanding through a range of strategies.
1.2 Deep Understanding	☐ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5	To what extent do students demonstrate a profound and meaningful understanding of central ideas and the relationships between and among those central ideas? Opening activity using chronological order and tags gave students the opportunity to develop deep understanding. Recursive use of the revision activity a great strategy for building deep understanding. Final summary discussion, while brief, demonstrated that deep understanding was in evidence across the class. (APST 4.2.1)
1.3 Problematic knowledge	☐ 1 ☐ 2 ☒ 3 ☐ 4 ☐ 5	To what extent are students encouraged to address multiple perspectives and/or solutions? To what extent are students able to recognise knowledge as constructed and therefore open to question? Revision at the start of the lesson posed a problem for students to solve relating to chronological order. Second activity involved students making decisions in order to complete a table.
1.4 Higher-order thinking	☐ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5	To what extent are students regularly engaged in thinking that requires them to organise, reorganise, apply, analyse, synthesise and evaluate knowledge and information? The activity included some in-built problems for students to solve, including working out whether some events were AD or BCE. Students also had to reorganise knowledge in different ways depending upon personal interest and differing structure. Metacognitive knowledge was developed by these activities. (APST 1.3.1 and 4.1.1)
1.5 Metalanguage	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent do lessons explicitly name and analyse knowledge as a specialist language? To what extent do lessons provide frequent commentary on language use and the various contexts of differing language uses? Focus on dynasties enhanced by links to current events - the links to Queen Elizabeth. Terminology - chronological order, dynasties. Lesson included numeracy elements - timeline and measurement - as well as the constant dynamic use of information to build a knowledge of history and a sense of its processes.

1.6 Substantive communication	☐ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5	To what extent are students regularly engaged in sustained conversations (in oral, written or artistic forms) about the ideas and concepts they are encountering? Opening activity allowed students to be involved in substantive communication. This was a feature of the lesson as a whole - scaffolded activities that gave students the opportunity to build their knowledge through group discussion and interaction. The conclusion of the lesson allowed students to demonstrate learning. (APST 1-3-1)
-------------------------------	--	--

QUALITY LEARNING ENVIRONMENT

2.1 Explicit quality criteria	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent are students provided with explicit criteria for the quality of work they are to produce? To what extent are those criteria a regular reference point for the development and assessment of student work? New unit and the purpose of the lesson clearly established at the start of the lesson. This school is big on 'success criteria' - did you consider using these for this lesson? I note that it was in your lesson plan and communicated verbally to students. The OneNote page was well structured and gave students clear guidance in what was necessary to complete the activities. Use of the five minute timer helped focus students on timely achievement of expectations. (APST 4-2-1)
-------------------------------	--	---

2.2 Engagement	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent are most students, most of the time, seriously engaged in the lesson? To what extent do students display sustained interest and attention? Clear engagement in the opening activity. Three groups of students understood and independently completed the activity. The other three groups were supported in their learning by your interactions. The group to my left clearly have issues with metacognitive regulation - outsourcing the thinking to one person in the group - but you managed this successfully. Students worked all the way to the bell. (APST 1-3-1)
----------------	--	---

2.3 High expectations	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent are high expectations of all students communicated? To what extent is conceptual risk taking encouraged and rewarded? Yes. The lesson provided appropriate challenges and opportunities to demonstrate knowledge. There was a lot in this lesson! My initial view was that you had planned too much for a single period and I was surprised by how much you achieved. Your preparation of a range of resources and your efficient and effective practice helped you cover a lot of ground in the lesson. Students were required to manipulate information in several different ways - which reinforced the connections between the content of the lesson in a way that led to greater retention of knowledge. (APST 4-1-1 and 4-2-1)
-----------------------	--	---

2.4 Social Support	☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5	To what extent is there strong positive support for learning and mutual respect among teachers and students and others assisting students' learning? To what extent is the classroom free of negative personal comment or put-downs? The scaffolded activities were the basis of strong, positive support for learning within the classroom. Students were actively involved and supported by the opportunities for them to substantively discuss work and to contribute to the learning of the lesson. When students reflected on the quality of their learning with me, they spoke highly of how much they had learned from your teaching. (APST 4-1-1)
--------------------	--	---

2.5 Students' self-regulation	☐ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5	To what extent do students demonstrate autonomy and initiative so that minimal attention to the disciplining and regulation of student behaviour is required? Classroom routines and practices well established. Very little need for disciplining students. Maintenance of focus throughout. When focus began to drift towards the end of the lesson, you quickly refocused students using an established routine. In discussion, students identified that the range of strategies you use and the opportunities for discussion that you have created have really enhanced their learning. (APST 4-2-1)
-------------------------------	--	--

2.6 Student direction	☐ 1 ☐ 2 ☒ 3 ☐ 4 ☐ 5	To what extent do students exercise some direction over the selection of activities related to their learning and the means and manner by which these activities will be done? Student direction elements were present throughout the lesson. The lesson was focused on knowledge acquisition but allowing students choice in (for example) the interesting facts that they wrote down was an effective strategy that enhanced the learning environment. Appropriate release of control to students facilitated differentiation and support for learning needs. (APST 1.3.1)
-----------------------	--	---

SIGNIFICANCE

3.1 Background knowledge	☐ 1 ☒ 2 ☐ 3 ☐ 4 ☐ 5	To what extent do lessons regularly and explicitly build from students' background knowledge, in terms of prior school knowledge, as well as other aspects of their personal lives? Reference to previous lessons and revision activity built on background knowledge.
--------------------------	--	--

3.2 Cultural knowledge	☐ 1 ☐ 2 ☒ 3 ☐ 4 ☐ 5	To what extent do lessons regularly incorporate the cultural knowledge of diverse social groupings? Development of cultural knowledge was implicit in the lesson by virtue of its subject matter.
------------------------	--	---

3.3 Knowledge integration	☐ 1 ☐ 2 ☒ 3 ☐ 4 ☐ 5	To what extent do lessons regularly demonstrate links between and within subjects and key learning areas? This lesson was very much focused on the acquisition of new knowledge about Ancient China. There were occasional references to other areas of history. The range of activities enhanced knowledge integration. (APST 4.2.1)
---------------------------	--	--

3.4 Inclusivity	☐ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5	To what extent do lessons include and publicly value the participation of all students across the social and cultural backgrounds represented in the classroom? The arrangement of the classroom, the established learning groups, the co-operation between students in groups and the positive interaction of the students were all indications of inclusivity. (APST 4.1.1)
-----------------	--	--

3.5 Connectedness	☐ 1 ☒ 2 ☐ 3 ☐ 4 ☐ 5	To what extent do lesson activities rely on the application of school knowledge in real-life contexts or problems? To what extent do lesson activities provide opportunities for students to share their work with audiences beyond the classroom and school? The references to current events in the explanation of dynasties enhanced connectedness.
-------------------	--	--

3.6 Narrative	☐ 1 ☐ 2 ☒ 3 ☐ 4 ☐ 5	To what extent do lessons employ narrative to enrich student understanding? The use of the video used narrative to enhance and connect the learning of Chinese history to your outcomes, it was well selected and integrated into the lesson.
---------------	--	---

TERTIARY SUPERVISOR DECLARATION: I, as the nominated Tertiary Supervisor for the University of Newcastle named below have ranked the above Teacher Education Student against the Quality Teaching assessment criteria outlined above. [Redacted Signature]	Date: 9/09/2022
---	---------------------------

Actioned by [Redacted] on 9/09/2022 12:37:30 PM

TEACHER EDUCATION STUDENT DECLARATION I, as the Teacher Education Student named below, acknowledge that I have read this QT assessment of my teaching. [Redacted Signature]	Date: 24/09/2022
--	----------------------------

PROFESSIONAL LEARNING AND REFLECTION ON TEACHING:

Ongoing dialogue and reflective discussion between all educational stakeholders not only safeguards students' active engagement in the co-construction of knowledge, but also ensures that education has the "potential for continual transformation" (Webster & Whelan, 2019, p. 9) that meets the evolving needs of local and global communities. I believe that this can only be achieved by placing students at the forefront of educational praxis (Dewey, 1910), and as such, I actively employ student-centred pedagogy throughout my lessons by differentiating activities, materials and assessments in response to the individualised needs, interests and competencies of my students (APST 1.5.1).

As a very mixed-ability class, the students of 7HISE possessed varied knowledge and capabilities in regard to literacy and numeracy components relevant to the History discipline, especially quantitative and non-verbal reasoning. This was particularly evident through my assessment of students' achievements in school-based and external testing – such as CogAT, NAPLAN and ACER PAT – which highlighted that this class struggled most with analysing written sources of information and formulating well-structured arguments. In response to the individualised learning strengths and needs illuminated by this data, I developed scaffolded lessons with learning activities implicitly divided into three key categories – structured, core and extension – with each area encompassing several exercises with clear directive verbs that supported students' progression towards higher-order thinking and the application of historical skills (APST 2.5.1). By embedding a literacy focus within this History unit, I was able to offer gifted students more challenging entry points into the content (Foreman & Arthur-Kelly, 2017), as well as address gaps in understanding amongst students with learning difficulties through the deconstruction of worked exemplars that provided all students with metacognitive strategies and attainable goals.

Such professional development and learning could not have been achieved without the constructive feedback provided by my Supervising Teachers, Tertiary Supervisor and other educators at San Clemente High School. Throughout my internship, I utilised this feedback to set weekly goals and create written, personal reflections on my lessons, in the interest of continuing to improve my teaching practice (Kostogritz, 2019) (APST 6.3.1). This reflexivity and application of feedback is an instrumental part of the educational profession (Patfield, Gore, Prieto, Fray & Sincok, 2021), and my capacity to consistently practice this is exemplified in the reports and individual lesson evaluations developed by my Supervising Teachers and Tertiary Supervisor.

LESSON FEEDBACK FROM SUPERVISING TEACHER (WEEK 2):

That core activity 2 would be a bit hard for the group of boys. Consider (some Qs)

Structured →

+ Core →

Extension →

Same again as last lesson. Try to bring in the students into your instructional phase, student contribution etc. *

Some more conversation about the activity perhaps. → i.e. do the first one with them. *

When you go up the front. → Try to stop all these small conversations in the room.
↳ Don't talk over people. *

Good use of task verbs in all of your questions. - Identify, define, outline etc.

You are doing well by creating activities at different levels. Lets chat about traffic lighting Year 7 students for your goals of the week.

Make sure if a student is sharing ideas that the class is listening → Applies to the hot activity

Bring all students into the conversation.

SAN CLEMENTE INTERNSHIP: LESSON REFLECTION

Week 2, Term 3, period 3

7HISE (Friday 29/07)

Successful Strategies That Went Well	Area for Improvement in Future Lessons
* Using clear visual cues (written on whiteboard) with time allocations to keep students accountable. * Addressed late-comers by name and took time to settle them/get them on task → may have minimised likelihood of distracting others. * Good variety of information (presentation modes) → video & written summary points & tables/diagrams. * Use of personal photographs from my travels to Pompeii in opening activity was well-received and engaging for students → more visual aids like this in later lessons? * Nice circulation of the room to assess engagement and understanding of all students → accompany well with guiding questions.	* Maybe provide the class with a worked exemplar prior to independent / small group work to clarify understanding of the task. → otherwise repeating instruction around the room or opportunity for misbehaviour ↳ also provides a visual of the final product expected and a clear outline of how to achieve it * Confusion may also be result of distraction → need to totally settle the class before giving instruction ↳ maybe give instruction before devices out or get lids closed once organised - trial and error? * Lesson flow was a bit jarring as students were at different stages of the lesson - could not effectively stop/start activities to have discussion as a class ↳ need to either let students work through all activities then have summative discussion instead. → use room circulation to assess throughout majority of lesson.

End of week 2 Goals

Action Plan: Standard 1 - Know students and how they learn.				
Goals	Professional Standards (e.g. 1.1.1)	Suggested Strategies	Resource	Review and Reflection
Within my Year 7 classes, I will work on embedding differentiation into my lessons that reflects the diverse needs of students.	1.5.1	Allow multiple entry points with structured, core and extension colour coding.	Teacher-developed example of STOP LIGHT colour coding.	19/08/22 consistent use of worked examples and extension prize page (still need to refine how this is comm. to student)
Action Plan: Standard 2 - Know the content and how to teach it.				
Goals	Professional Standards	Suggested Strategies	Resource	Review and Reflection
Action Plan: Standard 3 - Plan for and implement effective teaching and learning.				
Goals	Professional Standards	Suggested Strategies	Resource	Review and Reflection
Continue to embed Learning Intentions and Success Criteria into each of my lessons and articulating it to encourage accountability.	3.1.1	Visual cues to the posters developed around the room	Collaborative class posters	12/08/22 Good routine going with links to previous lessons & S.C.
Action Plan: Standard 4 - Create and maintain supportive and safe learning environments.				
Goals	Professional Standards	Suggested Strategies	Resource	Review and Reflection
Across all of my lessons, I will work on settling all students before giving instruction to ensure my directions are clear and understood.	4.2.1	Either give instructions before devices are out or get all students to lower their lids.		24/08/22 5 minute organisation rule working well to settle class before instruction
Action Plan: Standard 5 - Assess, provide feedback and report on student learning.				
Goals	Professional Standards	Suggested Strategies	Resource	Review and Reflection

LESSON FEEDBACK FROM SUPERVISING TEACHER (WEEK 5):

- # Lesson design good again.
 - ↳ Lesson sequence and linked to previous lessons.
 - ↳ Ext. activities good for a mixed ability class like this one. - Good! Some won't know about 'Blooms' - Could help to draw their attention, continued to provide students w activities as they got ahead.
- # Great voice projection. I could hear a confidence in your presentation! →
- # Good lesson overview!!
- # Hide down → good management strategy. I also heard you reinforce this, Good.
- # The lesson was really well tiered and allowed an entry point for all students!!
 - ↳ A progression of complexity.

LESSON FEEDBACK FROM SUPERVISING TEACHER (WEEK 7):

- # Good reminder about hands up.
- # Great focus on directive verb and a real break down at what is required. The literacy focus and forced unpacking of ~~the~~ the key elements was great.
 - ↳ I'm assuming that this is in response to the results of the writing task. You are showing that you are using formative data and responding with re-teach opportunities. This is exactly the direction I'm trying to take year 7. Great evidence to put into your portfolio. *
- # Great ~~was~~ feedback provided
- # Possibly moved too quick to the paragraph. Students still working on their learning goals.
 - ↳ The task was great though.

ASSESSING FOR AND REPORTING ON LEARNING (5.1.1, 5.2.1, 5.3.1, 5.4.1):

OVERALL CLASS/GROUP PERFORMANCE:

Prior to my internship at San Clemente, the Year 7 cohort engaged in standardised NAPLAN testing in March and April of 2022, which offered staff an external assessment of student's literacy and numeracy competencies. In evaluating the achievement of my 7HISE class in particular, I developed a colour-coded system to compare students' needs and abilities in these avenues and identified that Grammar and Writing were the two most prevalent areas requiring further development and improvement for my students (see Figure 1) (APST 5.4.1).

Whilst these trends provide a valuable insight into the current literacy capabilities of students in 7HISE, it is important to acknowledge that there are many "factors that play a part in the achievement" (Foreman & Arthur-Kelly, 2017, p. 199) of students in NAPLAN and other standardised tests, and therefore these results may not be reliable or an accurate representation of their academic capacity. For example, participation in formal test-taking and the commencement of high school can often be anxious experiences for students, certainly exacerbated by the significant disruptions and uncertainty brought about by remote learning and the COVID-19 pandemic (APST 5.4.1).

To prevent the stagnation or decline of students' academic progression and achievement in History, I worked collaboratively with my Supervising Teachers to embed informal, formative assessment tasks within the Year 7 program for Term 3. These small writing exercises not only challenged students to "reconstruct important ideas...so that they develop a deep understanding" (Killen, 2016, p. 334), but also presented an opportunity to diagnostically assess students' literacy development in the two key areas. As a result of this integration of formative assessment, the overall average grade of 7HISE grew by 6.41% in comparison to their Semester 1 results, as exemplified in Figure 2 (APST 5.3.1 and 5.4.1). As evident by this growth, my teaching has had a positive and constructive influence on the progression and achievement of my students across many of the key learning areas of Stage 4 History.

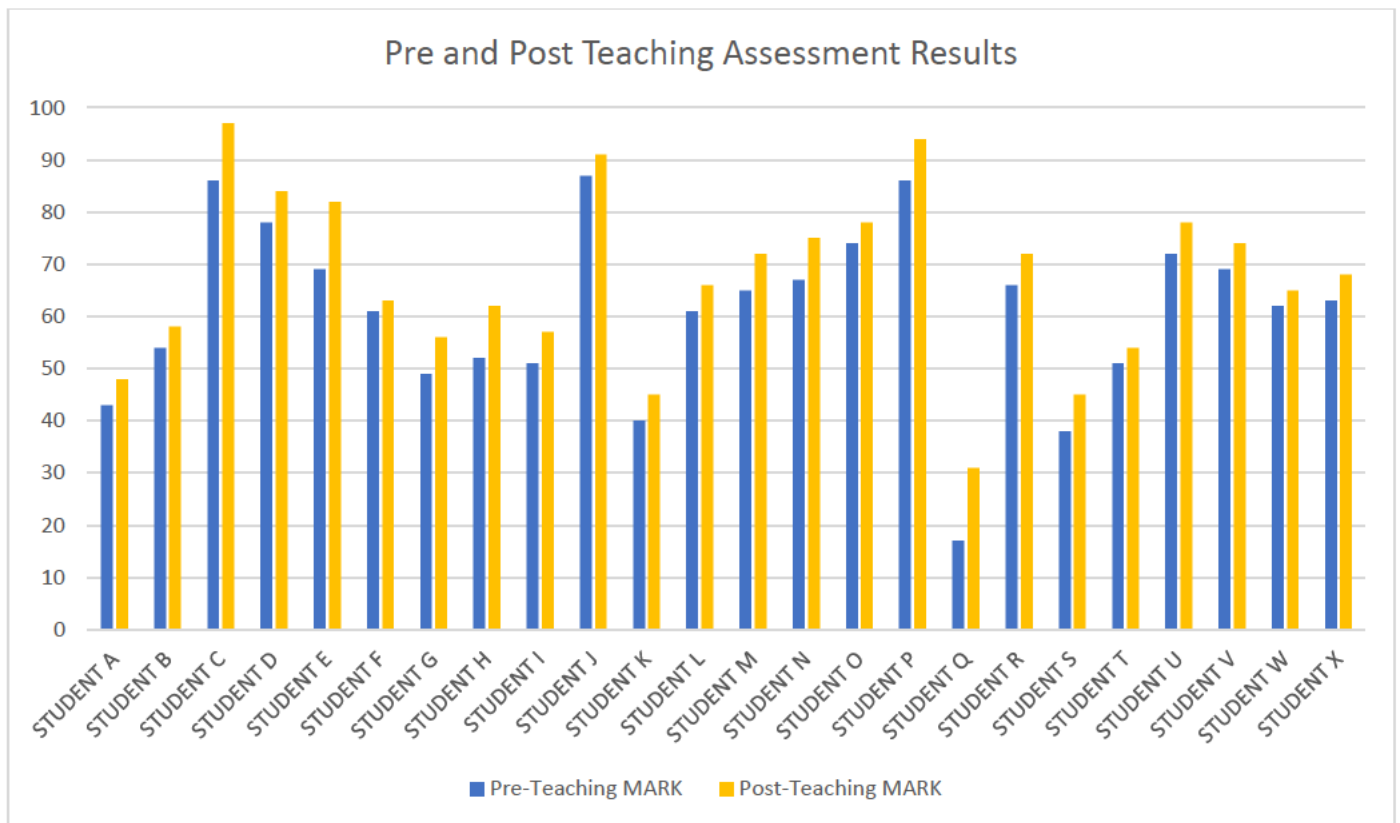

To accurately moderate the data produced, students' writing assessments were marked by myself according to a rubric designed specifically for these tasks (see Figure 3). This standardised rubric supported the cultivation of consistent and comparable judgements of student learning (Hattie, 2014), particularly relating to their effective integration of subject-specific vocabulary, connectives, punctuation, PEEL paragraph structure and historical source analysis.

YEAR 7 2022 NAPLAN Results (FIGURE 1):

2022 NAPLAN Year 7					
Name	Grammar	Numeracy	Reading	Spelling	Writing
STUDENT A	473.7	499.5	511.5	490.7	510

ACADEMIC ACHIEVEMENT OF 7HISE POST-TEACHING (FIGURE 2):

STANDARDISED RUBRIC FOR YEAR 7'S FORMATIVE ASSESSMENT TASKS (FIGURE 3):

Student Name: _____ Formative Task: _____

HSIE Faculties Proficiency Writing Scale Stage 4

	Beyond Proficient 3	I can 2	Getting there 1
Vocabulary	I can make careful vocabulary choices, including the use of subject-specific and technical language.	I can use at least 4 WOW words/phrases. And I can use 4 relevant course terms or concepts	I can use, or learning to use, some WOW words/phrases Or I can use, or attempt to use course terms or concepts
Connectives	I can use a wide range of connectives accurately (<i>although, since, nevertheless, contrary to, besides</i>) to link and relate events and ideas.	I can use a range of connectives (<i>when, because, if, after, while, also, as well, besides</i>) to link and relate ideas.	I can use some connectives (and, because) Or Only simple sentences are used
Punctuation	I can accurately use . ? , " " ... and 's.	I can mostly use C . ? , " " ... and 's with occasional mistakes.	I can mostly use base line punctuation (C.) Or Punctuation mistakes are evident throughout
Paragraph	I can structure a PEEL paragraph accurately, integrating specific and relevant evidence.	I can use paragraphs to represent individual ideas Sentence structure generally correct	Ideas run on without structure Multiple errors at a sentence level
Analysis	I can analyse elements of a source that support a historical argument. Using the 6 w's to determine usefulness and reliability	I can attempt to analyse elements of a source that support a historical argument. Using elements of the 6w's with reference to usefulness and reliability	I can attempt to analyse a source.

Feed Forward:

In the next writing task, consider ...

.....

.....

.....

Student Name: _____ Formative Task: _____

My main goals for the next writing task are:

1.
2.

Vocabulary	- Formal writing, serious tone, facts, complex word choice, and a third-person perspective. - No abbreviations, clichés, emotive or conversational language. - Subject specific terminology ('WOW' words") linked to the topic
Connectives	- Ideas connected within and between sentences using well-developed connective terms or phrases. - Writing flows cleanly with complex and compound sentences developed with the use of sophisticated connective words, phrases, or punctuation.
Punctuation	Includes appropriate use of capital letters for names and proper nouns.
Structure (sentence and paragraph, response)	- Focus on one main idea which is usually clearly identified in the topic sentence. - Every sentence is structured around relating or connecting to the main idea. (PEEL structure represents Point, Explain, Evidence, Link)

SAMPLES OF STUDENT WORK (DE-IDENTIFIED):

Throughout my pedagogical and professional practice on internship, I demonstrated a comprehensive understanding of assessment strategies utilised by contemporary educators, to evaluate students' comprehension of subject-specific content and attainment of key skills relevant to the study of History (APST 5.1.1). Whilst it was decided by the HSIE Faculty to postpone Year 7's summative assessment task to Term 4, I frequently collected and reported on student data, through my development and utilisation of informal, formative and diagnostic assessment tasks.

As discussed previously, I developed formative writing tasks for my 7HISE class which challenged them to analyse a series of historical sources and communicate their understanding using the PEEL paragraph structure. These informal assessments were conducted fortnightly in-class and were marked according to a designated rubric created in collaboration with my Supervising Teacher. Whilst students' marks were not explicitly presented to them, feedback and other comments were given in a timely and appropriate fashion (APST 5.2.1). In the absence of a summative task, I took the initiative of ensuring that these writing tasks were employed as an assessment for learning, and students were encouraged to reflect on the feedback, develop goals for their future writing and "move forwards, to plot, plan, adjust, rethink and thus... reach the next level of success" (Hattie & Yates, 2013, p. 66-67). These formative assessments were also a valuable tool for my own reflective practice, as they illuminated areas for further development, which enabled me to modify my program to accommodate for re-teach opportunities (Ryan & Webster, 2019) (APST 5.1.1 and 5.2.1).

The evidence exhibited below presents four de-identified student samples from an early, informal formative writing task completed with 7HISE. This selection showcases students of high, middle and low achievement, as dictated by their marks in their Semester 1 summative assessment task. This selection also encompasses a student from EALD and one of Aboriginal backgrounds, as well as three students with significant learning difficulties. This variety has been included to exemplify the inclusive and professional nature of my practice, and how such pedagogy has contributed to the academic progression and achievement of my students.

STUDENT SAMPLE OF FORMATIVE ASSESSMENT (STUDENT C):

HSIE Faculties Proficiency Writing Scale Stage 4

	Beyond Proficient 3	I can 2	Getting there 1
Vocabulary	I can make careful vocabulary choices, including the use of subject-specific and technical language.	I can use at least 4 WOW words/phrases. And I can use 4 relevant course terms or concepts	I can use, or learning to use, some WOW words/phrases Or I can use, or attempt to use course terms or concepts
Connectives	I can use a wide range of connectives accurately (although, since, nevertheless, contrary to, besides) to link and relate events and ideas.	I can use a range of connectives (when, because, if, after, while, also, as well, besides) to link and relate ideas.	I can use some connectives (and, because) Or Only simple sentences are used
Punctuation	I can accurately use . ? , " " ... and 's.	I can mostly use C . ? , " " ... and 's with occasional mistakes.	I can mostly use base line punctuation (C.) Or Punctuation mistakes are evident throughout
Paragraph	I can structure a PEEL paragraph accurately, integrating specific and relevant evidence.	I can use paragraphs to represent individual ideas Sentence structure generally correct	Ideas run on without structure Multiple errors at a sentence level
Analysis	I can analyse elements of a source that support a historical argument. Using the 6 w's to determine usefulness and reliability	I can attempt to analyse elements of a source that support a historical argument. Using elements of the 6w's with reference to usefulness and reliability	I can attempt to analyse a source.

Feed Forward:

In the next writing task, consider ...

Providing one specific example from Source A to support your argument as to why it isn't as useful or reliable.

Wonderful work!
😊

My main goals for the next writing task are:

- To supply more evidence on both sides of the argument
- Keeping up the strong openings.

Vocabulary	- Formal writing, serious tone, facts, complex word choice, and a third-person perspective. - No abbreviations, clichés, emotive or conversational language. - Subject specific terminology ("WOW" words") linked to the topic
Connectives	- Ideas connected within and between sentences using well-developed connective terms or phrases. - Writing flows cleanly with complex and compound sentences developed with the use of sophisticated connective words, phrases, or punctuation.
Punctuation	Includes appropriate use of capital letters for names and proper nouns.
Structure (sentence and paragraph, response)	- Focus on one main idea which is usually clearly identified in the topic sentence. - Every sentence is structured around relating or connecting to the main idea. (PEEL structure represents Point, Explain, Evidence, Link)

Year 7 History Formative Writing

Answer the following question:

On 26th October 1878, the bushranger Ned Kelly shot and killed unarmed police constable named Lonigan at Stringybark Creek in Victoria. Sources A and B are supporting conflicting sources. Argue which source is more useful and reliable in understanding the events of 26th October 1878. In your answer you must refer to the 6 W's of source analysis.

- Argue - give reasons or cite evidence in support of an idea, action, or theory, typically with the aim of persuading others to share one's view.

In your answer:

- Remember VCOP
- PEEL paragraph structure

I believe source B is more reliable because Ned Kelly supports why he shot Constable Lonigan while source A only tells us that he did it, and ^{Constable Lonigan} didn't even consider it happened out of self defence. This is why source B is more reliable and more useful to historians.

Excellent introduction

However, in source B Constable Maloney states that Constable Lonigan didn't even have his revolver out yet. Considering this and the fact Ned Kelly was a killer it's easy to blame Ned Kelly. The failure of showing the other side of the argument ultimately means that source B is more useful.

We may never know Ned Kelly's intentions on the 26th of October 1878 but logically it makes sense that he was under the influence that Constable Lonigan wanted to harm him. Though I don't think Ned Kelly should've been convicted for this death, he was guilty of many others.

Feed Forward:

In the next writing task, consider ...

Making sure you also refer to the other source (i.e. source A), and have a go at both parts of the question. You did an excellent job discussing source B's usefulness, so I would really love to read about your perspective on the reliability of these sources!

Great work

Year 7 History Formative Writing

Answer the following question:

On 26th October 1878, the bushranger Ned Kelly shot and killed unarmed police constable named Lonigan at Stringybark Creek in Victoria. Sources A and B are supporting conflicting sources. Argue which source is more useful and reliable in understanding the events of 26th October 1878. In your answer you must refer to the 6 W's of source analysis.

- Argue - give reasons or cite evidence in support of an idea, action, or theory, typically with the aim of persuading others to share one's view.

In your answer:

- Remember VCOP
- PEEL paragraph structure

I think that Source B is more useful. It has more detailed information in it and it gives a reason for why Ned Kelly shot Constable Lonigan. It was a primary source that said Ned Kelly did not want to kill Lonigan but felt he was forced into shooting him or he would've been shot himself. Ned Kelly thought his life was threatened and he claimed that he only shot him out of self defence. Excellent point

This is an excellent start
[REDACTED] It would be
great to see you then
discuss which source
is more reliable/
trustworthy.

Feed Forward:

In the next writing task, consider ...

Making clear and specific reference to the two sources provided (source A and B). In particular, I would be fascinated to review your perspective on the differing reliability of these sources - rather than just providing a broad discussion point on the fact that both McIntyre and Kelly had reason and a motive to lie.

This is an excellent start

Year 7 History Formative Writing

Answer the following question:

On 26th October 1878, the bushranger Ned Kelly shot and killed unarmed police constable named Lonigan at Stringybark Creek in Victoria. Sources A and B are supporting conflicting sources. Argue which source is more useful and reliable in understanding the events of 26th October 1878. In your answer you must refer to the 6 W's of source analysis.

- Argue - give reasons or cite evidence in support of an idea, action, or theory, typically with the aim of persuading others to share one's view.

In your answer:

- Remember VCOP
- PEEL paragraph structure

sox argument/structure

The issue with these sources is that they are both equally reliable. Both parties have potential and motive to lie or change the story, and both present an argument that matches the other in overall possibility and realism. Besides, Kelly was a ~~dead~~ dead man walking. There were plenty of witnesses to his other crimes, and his special cast-metal armour was now recognizable to everyone. So he had no motive to lie.

Good use of evidence to support argument

This is a great start. You have used a good PEEL structure and present a strong argument on the reliability of these sources. I would have liked if you would also state your position on the usefulness of these two sources in particular, in furthering our understanding on the events of this day.

Great introduction/
topic sentence!

In my opinion, source B is more useful because it's more detailed than source A. It ^{has} more information, ^{and} there was a reason for why he shot constable Lonigan. ✓

This is a great start. You provided an excellent topic sentence and gave reasons for this. I would love you to now give more specific reasons using the sources → e.g. what reason does Source B give for Kelly shooting Lonigan?
